---

Hello Richard,

Thank you for your assistance with this. We have copies of the documents listed below, with the exception of the 3/25/05 Excavation Confirmation Sampling Report (CX 29).

Thanks,

**Krista Rose**

Hello Krista – thanks for talking with me this morning and clarifying that the scope of your request is only for soil and ground water related data and does not include internal notes, drafts or similar documents that may exist. This should significantly reduce the scope of documents to be reviewed down from approximately 500 electronic files and at least two file drawers of paper documents. It should also significantly reduce the fees associated with the request and may expedite it.

To date the research fees incurred are at the \$218 you previously authorized so we cannot incur any more costs without your approval. I can give you a better idea of the remaining costs if you can let me know if you need copies of any of the following documents. These were either provided by Summit or may have been previously provided by EPA to Summit in the administrative complaint as part of the hearing exchange of documents. If we can eliminate these from the list of documents then we should have a very manageable search which can be completed quickly. Note, I am not sure that the Agency has these documents – just that they are referenced in other documents. If we have to search for these I will let you know the costs. The dates may be slightly off but they are the best I can ascertain.

3/23/06	Phase II Environmental Assessment (CX 28)
3/25/05	Excavation Confirmation Sampling Report (CX 29)
5/30/06	Split Sampling Report (CX 30)
7/6/06	Report of Soil and Groundwater Test Pit Investigation (CX31)
7/22/08	Corrective Plan – Berry Refinery
11/2005	Report of Phase II Environmental Site Assessment (may be the same as CX28?)
8/2006	Report of Groundwater Investigation Fomer Berry Refinery

12/2006

Report of Further Site Investigation
